

EXPERIMENT 4

DATA MODELLING AND FORM DESIGN

AIM

To design and implement an Insurance Claim Request Form in Zoho Creator using appropriate data fields, validations, and a report for managing insurance claim information.

OBJECTIVE

To create a structured digital insurance claim request form that captures claimant, policy, contact, incident, claim amount, supporting document, callback, and declaration details.

PROCEDURE

1. Open the Insurance Claim application in Zoho Creator and open the Claim_Request_Form.
2. Design the form using the required basic field types and configure the necessary mandatory fields.
3. Configure the claimant, contact, policy, claim, incident, scheduling, and declaration fields.
4. Configure the Claim_Request_Report to display submitted claim information.
5. Add sample claim records and verify that the submitted information appears correctly in the report.

RESULT

The Insurance Claim Request Form was successfully designed in Zoho Creator and the Claim_Request_Report was populated with three sample claim records. The form and report provide a structured method for collecting and viewing insurance claim information.
